

It is unacceptable that the FCC has expanded the number of radio and television stations one media owner/group can own. The number should be reduced dramatically. What I see and hear mostly is not accurate, indepth news. What I see is the same media owners, with biased opinion, skimming the surface, with no substantial facts, over a broad number of stations, which doesn't reflect coverage of the actual news of the larger populace, and reflects one media company's promotion of their political agenda. Sinclair Broadcast Group is a good example of this. I do not feel our public airways are best serving our communities in this way. We need to have many different voices, more from our own communities heard. Not fewer voices with the same message spread to many news outlets. I am very disheartened to see what has happened and consider this the FCC's failure to carry out your most fundamental directive to make sure the airways serve the people of this country. Yes, the people. Not the corporations, the people. What you have done hurts the democracy of this nation severly. Do not let industry lobbieist write our laws. We need media reform now. Sincerely,  
Jean Ilsley
